DESIGN DETAILS

Discover the options available for the Ancona range, including wood finishes, and edge profiles, allowing you to tailor the design to your needs.

—

WOOD FINISH

Choose from four carefully selected wood finishes.

UP / WITHOUT PATINATION

The wood is planned and sanded to achieve a smooth surface. With few and smaller knots.

Storage furniture and small pieces leaves can only be made with this finish!

RL / RAW LOOK

We brush off the layer of softer wood which gives a look of wood that has been roughened by natural wear.

May contain more and larger knots.

SC / SOFT CRACKS

Naturally occurring cracks are made more visible which gives a rustic look with cracks in the surface.

May contain more and larger knots.

FK / FILLED KNOTS

The knots are filled and the wood is planned and sanded to achieve a smooth surface.

Only for OAK and not possible on legs.

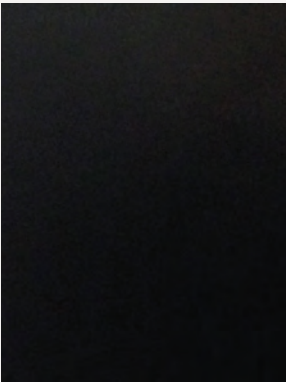

STEEL FINISH

Choose from three carefully selected steel finishes.

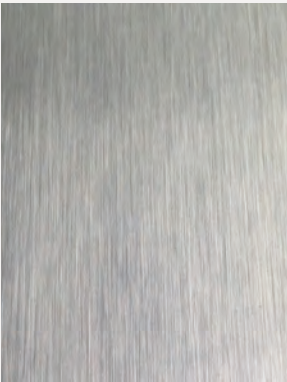

A / INDUSTRIAL STEEL

Industrial steel has a raw and matte appearance with shades of colors emerged during casting.

B / BLACK PAINTED STEEL

Black painted steel has a graphical and simple look, that fits nicely in most homes.

C / BRUSHED STAINLESS STEEL

Brushed, stainless steel has an elegant appearance with a uniform finish created by hand.

Extra cost!

TECHNICAL DETAILS

SOLID WOOD

A living material

Wood is a living material and since the herringbone plate is composed of smaller pieces of solid wood lying in different directions, it should be expected that small cracks will occur between these pieces. This is a very natural thing that is also experienced on e.g. herringbone floors.

The cracks occur primarily because of the climate, in which the wood in a dry climate will contract and conversely expand in a more humid climate. As these are relatively small cracks this is not accepted as a claim. If you want to reduce the

visibility of the cracks on a dark table, you can sand it lightly and oil the table again with our oil colours, then the cracks will become coloured and appear smaller.

We also recommend that the table is continuously treated with a suitable care oil to add moisture to the table.

Find the right care solution on the website:

<https://www.kristensen.com>

EXAMPLE OF CRACKS THAT ARE TO BE EXPECTED

EXAMPLE OF SMALL GAPS THAT ARE TO BE EXPECTED

Table tops for the Ancona range is constructed with a frame and a filling (with herringbone pattern).

Movements is natural and small gaps between the frame and the filling is not accepted as a claim.

There can also be movements in the frame itself and small gaps/edges can appear.
